AMENDMENTS TO THE CLAIMS

This listing of the claims replaces all prior listings and versions:

1. (currently amended): A vaso-occlusive composition consisting of

a vaso-occlusive member selected from the group consisting of one or more vaso-occlusive coils, one or more filters, and combinations thereof; and

a bioactive material selected from the group consisting of fibrin; polyethylene glycol derivatives; thrombin-coated gelatin granules; balloons coated with iron microspheres; trace metals; thrombus-stabilizing molecules; at least one cytokine; DNA; RNA; functional fragments of DNA, RNA, or cytokines; and combinations thereof, wherein combinations of bioactive materials are not contained in separate layers and wherein the vaso-occlusive member is selected from the group consisting of one or more vaso-occlusive coils, one or more filters, and combinations thereof.

2 to 4. (canceled).

- 5. (withdrawn): The composition of claim 1, wherein the material comprises a trace metal.
 - 6. (withdrawn): The composition of claim 5, wherein the trace metal comprises copper.
- 7. (original): The composition of claim 1, wherein the material comprises a thrombus-stabilizing molecule.
- 8. (original): The composition of claim 7, wherein the thrombus-stabilizing molecule is Factor XIII or functional fragments thereof.
- 9. (original): The composition of claim 7, wherein the thrombus-stabilizing molecule is plasminogen activator inhibitor-1 (PAI-1) or functional fragments thereof.
- 10. (original): The composition of claim 7, wherein the thrombus-stabilizing molecule is α_2 -antiplasmin or functional fragments thereof.

USSN: 09/749,980

Atty. Dkt. No.: 8600-0010 Client Dkt. No.: 00-0312 01 US

11. (previously presented): The composition of claim 1, wherein the bioactive material is adsorbed to the vaso-occlusive member.

12 to 13. (canceled)

- 14. (original): The composition of claim 1, wherein the vaso-occlusive member is plasma treated.
- 15. (original): The composition of claim 1, wherein the vaso-occlusive member is subjected to ion implantation.
- 16. (original): The composition of claim 1, wherein the vaso-occlusive member is microtextured.

17 to 18. (canceled).

19. (original): A method of occluding a vessel comprising administering to a subject in need thereof a vaso-occlusive composition according to claim 1.

20 to 21. (canceled).

- 22. (withdrawn): The method of claim 19, wherein the trace metal is copper.
- 23. (original): The method of claim 19, wherein the thrombus-stabilizing molecule is selected from the group consisting of Factor XIII, α_2 -antiplasmin, plasminogen activator inhibitor-1 (PAI-1), combinations thereof and functional fragments thereof.
 - 24. (original): The method of claim 19, wherein the vessel is an aneurysm.

25 to 30. (canceled)

31. (previously presented): A vaso-occlusive composition comprising a vaso-occlusive coil, a liquid embolic material and an additional bioactive material selected from the group

USSN: 09/749,980

Client Dkt. No.: 00-0312 01 US

consisting of DNA; RNA; functional fragments of DNA, RNA, or cytokines; and combinations thereof, wherein at least one of the bioactive materials is attached to the vaso-occlusive coil.

- 32. (withdrawn): The vaso-occlusive composition of claim 31, wherein the liquid embolic material is a particulate material selected from the group consisting of microspheres, granules and beads.
 - 33. (canceled).
- 34. (withdrawn): The vaso-occlusive composition of claim 31, wherein the vaso-occlusive coil is absorbable.
- 35. (withdrawn): The vaso-occlusive composition of claim 32, wherein the particulate material is absorbable.
- 36. (withdrawn): A method of occluding a vessel comprising administering to a subject in need thereof a vaso-occlusive composition according to claim 31.
 - 37. (withdrawn): A vaso-occlusive composition comprising
- a vaso-occlusive member selected from the group consisting of one or more vaso-occlusive coils, one or more filters, one or more retention devices and combinations thereof; and thrombin-coated gelatin granules or balloons coated with iron microspheres.
